Areas of activity

Aquaculture, Food and Cosmetics.

1. Seaweed aquaculture in land-based systems under the Integrated Multi-Trophic Aquaculture (IMTA) sustainable concept.
2. Commercialization of seaweed-based products for the food and cosmetic sectors.
3. R&D services in land-based seaweed cultivation.

Products and Services

1. Organic seaweed-based finished food products (dried and fresh seaweed, seasoning products, ready-meals): Tok de Mar®
2. High quality and organic certified bulk seaweed (dried & fresh produce): ALGA+®
3. R&D services for customization of the seaweed biomass to our customer's specific needs, including the production of novel species of interest: ALGA+®

Market application

Food retail shops and restaurants.

Food and cosmetic industries seeking a natural and healthy ingredient assured with quality, traceability, organic certification, stability of supply and a small carbon-foot print that can help to differentiate their products.

Innovative aspects

Our unique sustainable land-based seaweed production system (IMTA) that allow us to continuously provide Atlantic seaweed with high levels of quality, security and traceability, offering unique and customized solutions to our customers' needs. First EU company cultivating Porphyra (atlantic nori) species.

International Markets of Interest

UK, Ireland, Netherlands, Germany, France, Japan, USA and Canada.

Areas of activity

Leixões is an exporter port par excellence, serving virtually all types of ships and cargo as well as cruises. It offers various regular shipping services to major European and global ports and has direct weekly connections to Angola and other African countries.

Products and Services

Leixões is one of the most comprehensive and competitive ports in their natural area of operation, where annually spend about 3000 ships, more than 600 000 TEUs (about 400 thousand containers) and all kinds of goods, including cereals, paper and cardboard, scrap, iron and steel, granites, textiles, sugar, beverages, cements, cork, components for wind turbines and petroleum products.

Market application

APDL – Port Authority of Douro, Leixões and Viana do Castelos, is a limited company wholly publicly owned, which is engaged in the administration of the Douro, Viana and Leixões ports, aiming at its economic exploitation, conservation and development.

Innovative aspects

The use of modern communication techniques, supported by a philosophy of E- Port Community Systems, is one of the critical factors of success for the development of port business and led to the design of the JUP - Port Single Window.

International Markets of Interest

The main destination countries are Angola, United Kingdom, Algeria, Morocco and USA, from a set of 181 countries. The main commodities exported were the Refined Products and Aromatics, Iron and Steel, Paper and Cardboard, Cobblestones, Beverages, Tiles and Mosaics, and Machinery.

E-mail sotto.maior@portofigueiradafoz.pt

Areas of activity

Port and maritime transport sector, import and export; cruise ships, marina; fishing port, naval construction and repair.

Products and Services

Port offers berthing and other services to the merchant ships and to its cargoes, inbound and outbound, like loading, unloading and storage (open space and covered). Port operates general breakbulk cargo, containers, solid bulk and liquid bulk cargo types. Port can receive cruise ships of small dimension. Port is provided with marina for leisure crafts and fishing port for fishing vessels; There is a private operated shipyard providing services of naval construction and repair.

Market application

Tourism in center region of Portugal (cultural, gastronomic and religious among others) can be considered as a potential and very interesting market to be developed in near future for attracting cruise ships of small or small/medium dimension to Figueira da Foz port.

Innovative aspects

Intermodal services between sea and land transportation (port is serviced with railroad); single port window national network application for ship process quick management with all intervening players on line.

International Markets of Interest

Foreland for export goes from North Europe to North Africa to Mediterranean. Port is vocationed for short sea shipping. Interest of expanding hinterland to Spain inland areas and also to new destinies within the regions mentioned above (North Europe, North Africa and Mediterranean).

Administração do Porto de Lisboa, S.A.

Public Company (Port Authority)

Gare Marítima de Alcântara

1350-355 Lisboa – PORTUGAL

Phone

+351 213 611 000

E-mailgeral@portodelisboa.pt**Website**www.portodelisboa.pt**Areas of activity**

Port of Lisbon it's a multifunctional port and handle all type of cargo. In 2016, Port of Lisbon handled nearly 12 million tons, of general cargo, mainly containers and solid and liquid bulk, as well as fluvial cargo. In addition we have a remarkable growth in cruise tourism, with more than 500 thousand passengers per year.

Products and Services

In the exports sector, Port of Lisbon handle mainly cement, marble, wine, soya oil, biodiesel, food preparations and prepared tomato. Concerning import goods, the Port of Lisbon handle gasoil, corn, wheat, soya, milk, fish, and several other products. Port of Lisbon also provide a client oriented multifunctional services as mooring, towage, bunkers, waste and slops, water and other supplies.

Market application

Port of Lisbon is an important multimodal logistics platform, which is integrated in the Trans-European Transport Network assuring the quick flow of merchandises. The geo-strategical centrality places the port among the world's main maritime routes.

Innovative aspects

Port of Lisbon is strongly committed to innovation: the "Port Single Window" is a technological platform that implements the "One-Stop-Shop" concept. The extension to Logistics Port Single Window will include all players of this business.

International Markets of Interest

Port of Lisbon assumes the role of fundamental link between the Mediterranean and the North of Europe, as well as between Europe, Africa and America. Main markets for the imports are Spain, Ukrain, Brasil, UK and France, and for exports mainly with Angola, China and Netherlands

Organisation

APS – Ports of Sines and the Algarve Authority, S.A

Organisation Type Public Company (Port Authority)
Headquarter Rua do Porto Industrial
 7521-953 Sines - PORTUGAL

Phone +351 269 860 600
E-mail geral@apsinesalgarve.pt
Website www.apsinesalgarve.pt

Contact Person

Name João Franco
Position CEO
E-mail geral@apsinesalgarve.pt

Areas of activity

Administração dos Portos de Sines e do Algarve, S.A. (APS) is the company managing the ports of Sines, Faro and Portimão. The ports located in the Algarve, Faro and Portimão, are respectively, a small general cargo terminal and a cruise terminal. The Port of Sines is Portugal's largest deep-water port and is a bustling hub of activity that caters to a host of industries with liquid bulk, petrochemical, multipurpose and RoRo, LNG and container terminals.

Products and Services

Sines Terminal Multipurpose has a depth of 18 m and multi-purpose facilities geared towards handling dry bulks, general cargoes and RoRo deliveries through four berths, with a total length of 645 m at the "extrados" and 296 m at the "intrados". Endowed with one jetty with beds of 15 m ZH, it allows the reception of LNG tankers up to 225 000 m³. The recent Terminal XXI provides natural water depths of 17,5 m, allowing the mooring of nine post-panamax and super post-panamax gantry cranes along a 946 m quay.

Market application

Sines is a hub port offering direct regular services to the whole world in the different types of cargoes. It is the country's leading port in terms of cargo handling, representing more than 50% of the total cargo handled, being also the country's leading export port. Sines is the country's main supplier for energetic products, while its containerized activity has been boosting.

Innovative aspects

All the terminals operate 24 hours a day, 365 days a year and multichannel integration to every client through the "JUP" – Port Single Window. Sines has also been a pioneer in the implementation of the FUP – Port Single Invoice and allowing the issuing of a unique invoice to ships.

International Markets of Interest

The main clients for export cargo are some countries in Europe, such as diesel to Spain and France, gasoline to the USA, refined coal to France and Norway and containerized cargo to the whole world.

Areas of activity

Development of marine energy, with special emphasis on wave energy.

Products and Services

Provide an area of about 320 Km² of open space on the Atlantic coast, dedicated to the development of marine energy, with significance on wave energy.

Market application

Development and study of marine energy in real environment.

Innovative aspects

The Pilot Zone has a great energy potential, with great exposure to the oceanographic elements, especially winds and waves.

International Markets of Interest

Portugal offers the ideal conditions for the development of marine renewable energy.

The Portuguese Pilot Zone has a high energy potential, without having a lot of destructive storms. The promoter can develop their project from concept to commercial demonstration stage, always in the same place.

FIBERSAIL

Shaping the structures of tomorrow

Organisation Fibersail
Organisation Type Company

Headquarter UPTEC - Pólo do Mar, Av. da Liberdade
4450-718 Leça da Palmeira - PORTUGAL

E-mail info@fibersail.com
Website www.fibersail.com

Contact Person

Name Pedro Pinto
Position CEO
E-mail pedro.pinto@fibersail.com

Areas of activity

Structural health monitoring of critical structural based on innovative shape sensing system powered by machine learning tools.

Products and Services

Fibersail offers a real-time shape sensing system to monitor the structural behavior of critical structures, such as wind turbine blades.

Market application

Fibersail shape sensing system is designed to be applied on Wind turbine structures, like rotor blades, towers and foundations, but can also monitor other critical structures on the energy, Oil&Gas and Aerospace industry.

Innovative aspects

Measurement of the shape along the entire length of the structure in real working environment. It isn't an embedded device like current solutions, so the same system can monitor different structures and be re-used. The innovative automated solution enables the reduction of costs in more than 50%.

International Markets of Interest

Fibersail intends to export to the EU in the first stage and to US and China in the second phase of the project.

E-mail info@flowtech.pt
Website www.flowtech.pt

Contact Person

Name Miguel Fernandes
Position CEO
E-mail miguel@foodintech.pt

Areas of activity

FoodInTech by Flow presents a IT solution for food production control. Based on the integration of several systems associated to the food production activity in a single computing platform, the SIGA application for food production management is the basis for the integration of a set of technologies, supporting the strategy: Information systems > Integration > Automation.

Products and Services

SIGA IT is a MES – Manufacturing Execution System, which integrate above, with the ERP and below with the production equipments (Scales; Machines; Temperature control Systems; Automata; etc...). SIGA IT application is designed for the control of Production, Quality, Food Safety, Traceability, Stock, Picking, and Distribution.

Market application

Food Industry: Meat Industry; Aquaculture, Fishery and Fish Processing Industry; Bakery and Pastry Industry; Dairy Industry (milk); Feed Industry; Fruit and Vegetable Industry; Oil and Fat Production Industry, Cereals and Leguminous Processing Industry.

Innovative aspects

The structure of the system allows data collection at the Shop Floor, which, by itself, leads to a higher accuracy in its use. This information, allows a quick access and a deeper involvement and performance of the operational team.

International Markets of Interest

Spain; France; Germany and Holland.

Organisation Galantic Tours, Lda
Organisation Type Company

Headquarter Rua Capitão Jorge Larcher, apto 27, Ofir

Areas of activity

OLSPS International is a market leading, marine data specialist group with expertise in analytical consulting and development of software solutions with specific focus on the commercial marine sector. OLSPS International has two sister companies based in Cape Town, South Africa. OLSPS Marine, a technical unit specialising in Fisheries Management and the development of Electronic Logbook Solutions for the commercial fishing sector and OLSPS Analytics, which specialises in the development and deployment of predictive analytics and machine learning solutions to a broad range of commercial sectors.

Products and Services

In fisheries management, OLSPS offers fishing survey design and analyses, stock assessment, development of population dynamic models and management procedures. Also, the development and deployment of electronic logbooks (eLog) mainly for commercial fisheries. The core eLog software solutions offered are the vessel unit, the Olrac Dynamic Data Logger (OlracDDL), designed to record and report a large variety of data during commercial fishing operations and the Olrac Dynamic Data Manager (OlracDDM), a web-based data management solution.

Market application

The Olrac eLog solution is used daily by hundreds of vessels in numerous fisheries around the world. These solutions are certified for compliance reporting in Europe, Australia, New Zealand, the USA and soon in Canada.

Innovative aspects

OLSPS is developing Artificial Intelligence (AI) and machine learning based tools in order to derive insight from data collected by the Olrac system and translate this insight to a variety of tools for the benefit of fishers, management authority and the scientific community. OLSPS also offers an integrated and fully Electronic Monitoring and Reporting (EMR) solution and significantly faster and inexpensive satellite communication systems to facilitate real time data exchange and thus the timely and efficient management of fish resources.

PORTFOLIO FÓRUM OCEANO MEMBERS

Organisation SEAentia
Organisation Type Aquaculture start-up company

Headquarter Parque Tecnológico de Cantanhede, Núcleo 04,
Lote 2, 3060-197 Cantanhede, Portugal

Phone +351 917 055 370
E-mail joao.rito@seaentia.pt
Website www.seaentia.com

Contact Person

Name João Rito
Position Founding partner & CEO
E-mail joao.rito@seaentia.pt

Areas of activity

SEAentia operates in the aquaculture sector. It will produce seafood (firstly, meagre) with a state-of-the-art recirculating aquaculture facility. By applying the best aquaculture practices to respect animal welfare and the environment we will sustainably produce high quality seafood, which will be reflected in the nutritional value of the end product.

Products and Services

SEAentia will deliver several products, including grown meagre of 2-3 kg as whole-fish for hotels and restaurants, and processed meagre as fresh or smoked fillets and slices, packed and traceable from egg. SEAentia will also have a hatchery, which will provide high quality, genetically selected meagre fingerlings for aquaculture producers.

Market application

For the grown harvested meagre (processed or not) our customers will be supermarkets, restaurants, hotels and seafood retailers, especially dedicated to sustainable products. For the live pathogen-free meagre fingerlings our customers will be other aquaculture companies and R&D institutions.

Innovative aspects

SEAentia will pioneer the application of recirculating technology in a 1000 MT/year meagre production. This will result in a market supply of the best quality and fully traceable meagre throughout the year.

International Markets of Interest

SEAentia's main market of interest will be Spain, under the label of local Iberian production. Nevertheless, SEAentia is also aiming to reach the Northern European markets with its processed products, such as UK, France, Benelux, Germany and Scandinavia. USA is also an attractive possibility.

Areas of activity

CIIMAR is a leading research and advanced training institution of the University of Porto, working on the frontier of knowledge and innovation. The centre develops transdisciplinary and transnational research, promotes technological development and supports public policies and governance in Marine and Environmental Sciences. The fields of expertise cover three research domains: GLOBAL CHANGES AND ECOSYSTEM SERVICES, AQUACULTURE AND SEAFOOD QUALITY, and MARINE BIOTECHNOLOGY.

Products and Services

CIIMAR offers a variety of standard and of custom-made products and services using transdisciplinary approaches within its fields of expertise. The centre features well equipped facilities for research and services, with state-of-the-art equipped laboratories, technological core platforms (Structural and Chemical Analysis, Imaging and Microscopy, Genomic and Proteomics, Bioinformatics, Biorefinery, Cell cultures, Ecotoxicology, Oceanography and Modelling, Scientific diving, etc.), high scale micro and macroalgae cultivation and animal experimental facilities.

Market application

CIIMAR provides multiple solutions with high market attractiveness, namely the innovative instruments and platforms for the management of marine ecosystems and maritime services; the disruptive solutions for aquaculture systems, and the discovery of novel marine bioactive compounds and bioproducts with pharmacological, nutraceutical, cosmeceutical, anti-biofouling applications.

Innovative aspects

Involved in clustering activities, participating in relevant European and global Knowledge and Innovation Networks. Follows an innovative-based strategy towards collaborative research, fostering researchers' expertise, promoting market-oriented research and industry liaison activities.

Areas of activity

The Faculdade de Ciências Sociais e Humanas (Faculty of Social and Human Sciences - FCSH) is an organic unit of the Universidade NOVA de Lisboa (NOVA) and a legal person under public law, endowed with scientific, pedagogical, administrative and financial autonomy, whose public service mission is to qualify citizens at the highest level. According to its statutes, "the Faculty of Social and Human Sciences of NOVA University of Lisbon is an institution dedicated to education, scientific research and cultural creation"

The Faculty's own identity stems from the coexistence of social sciences with humanities, allowing an unusual interdisciplinary approach in the Portuguese higher education panorama.

Products and Services

The Faculty's includes the classrooms buildings, the Mário Sottomayor Cardia Library, boards of management, administrative services, cafeteria, student's association and, since 2009, the ID building (Research and PhD degrees). This building, known as the former DRM (Military District Recruitment), has recently undergone a major change in order to be adapted to the new objectives it has been assigned. The core of the administrative support for PhD degrees, the research units associated with FCSH/NOVA and classrooms for the PhD programmes are located in the ID building.

In addition to teaching areas (classrooms, lecture halls and auditoriums), the FCSH/NOVA also has various spaces for socialization, a printing centre and a large courtyard. To solve logistical issues created by recent growth, new facilities are scheduled for the FCSH/NOVA in the plans of the Campolide Campus, where other Faculties of the Universidade Nova de Lisboa (NOVA) are already installed, such as the School of Business and Economics (SBE), the Faculty of Law and the Information Management School. The Rectory of NOVA and the University residence Alfredo de Sousa are also located in the Campolide Campus.

Name	Luís Madeira David Silva
Position	President Sports Director and Nautical Station Manager
E-mail	luismadeira.ang@mail.telepac.pt; david.ang@mail.telepac.pt

Areas of activity

ANG develops its activities in the promotion and development of nautical sports, with particular emphasis of sailing, canoeing and phishing. ANG competition teams participates in the Regional, National, European and World Championships and its main activities are:

- Nautical Club with sports schools and competition activity in sailing, canoeing, fishing and power boats;
- Nautical licenses school;
- Marina management and exploitation;
- Restaurant and bar management;

Products and Services

Complementary to the main activity and goal that is developing nautical sports and providing free practice, learning and competition the all the community (local and neighbour) we offer a pack of nautical activities concerned with the marina berths, maintenance, stay, food and beverage.

Market application

We present ourselves to the market with our products (Marina, Restaurant, bar, fuel) as a quality product and services provided in the historical classified centre of an 20 000-inhabitant town located in the boarder of an international river.

Innovative aspects

- Free practice that is offered to all the community and the partnerships with schools and local authorities for the promotion of nautical sports and activities.
- All profits are located to support the free activities and all the costs.
- No difference between member and non-members of the club.

International Markets of Interest

Once we are located at the board of an international river that divide Portugal and Spain we have strong market shear of Spanish clients from all over rand country and in particular from Andalucía. Like all the Algarve the markets from France, UK and Scandinavia are the ones that visit us in the summer in short periods of stay.
